

Please note: images and options were generated through AI and are not perfect. We attempted our vision of an underwater palace surrounded by an extensive labyrinth and this was the best result. We would have liked to see a a better visual of our concept, but we this was the closest we could design after multiple attempts on different apps. We do hope this visual can showcase our concept as a way to understand the flow and not as a focus on our artistic ability or functionality of AI. In an ideal world, we would work with a graphic designer who could truly bring our map vision to life.

Thank you!
