

Project Management - The Enchanted Coral Kingdom

SPOTTING SHEET

General Concept:

"The Enchanted Coral Kingdom" is an educational IDN that follows a curious fish named Crystal. When out exploring, Crystal stumbles upon a message in a bottle and must decide if she will answer its call. The journey ahead will push Crystal to make difficult decisions, solve various puzzles, and meet new friends along the way. With each new challenge, Crystal will discover the biodiversity and complexity of coral reefs while searching for the solution to save the mystical world.
